INTERNSHIP

Web Development, TELUS International   Aug 2023 - Dec 2023

- Crafted visually appealing and user-friendly website layouts using HTML, CSS, and JavaScript during a dynamic frontend web development internship.

- Collaborated closely with cross-functional teams to understand project requirements and implemented responsive design principles to ensure seamless user experiences across devices.

Networking Intern, FTK-Centre for IT, New Delhi   Feb 2023 - Mar 2023

- Implemented and maintained network infrastructure, ensuring seamless connectivity, troubleshooting issues, and optimizing performance during a networking internship.

ACADEMIC PROJECT

Jamia Community Information System   Jun 2023

- Led the creation of the Jamia Community Information System, uniting the university community through a user-friendly platform categorized by professions.
- Utilized HTML, CSS, and JavaScript to design and implement an intuitive and visually appealing user interface, ensuring a seamless user experience.
- Employed PHP to handle server-side functionalities, enabling the system to collect and organize comprehensive details about individuals based on their professions.
- Integrated MySQL to create a robust database, facilitating efficient data storage, retrieval, and management within the system.
